Jobs, Jobs, Jobs

Donald Trump has called for more jobs here in America. He is proposing massive tax breaks for corporations and billionaires saying this will create U.S. jobs. But the last time corporations and the wealthy were given tax breaks the money wasn't used to create jobs. Most of the money went into corporate executive compensation, dividends and stock buy backs. When factories were built they were built not in the U.S. but instead in China, Mexico, Vietnam and Bangladesh where labor was cheap. That will happen again if we, the voters, don't act now to prevent it.

Congress has the power. They need to use it to make change happen. If you voted for U.S. jobs not just tax breaks for the rich and factories in China you need to let Congress know you are watching.

Call our Congressman Tom McClintock. His telephone number is available on Google. Tell him that when he votes to lower taxes on the billionaires and votes to lower the corporation tax rate you will be very upset if there is no requirement that the tax savings go toward creating U.S. jobs. Maybe even some in El Dorado County. Building more factories overseas was not what was promised. Promises need to be kept.
